REQUIEM 

## INTRODUCING REQUIEM® INSECTICIDE

REQUIEM is a unique insecticide that targets all lifecycle stages of profit-robbing sucking pests – including leafminers and Western Flower Thrips – with a mode of action unlike any other product on the market today.

With 4-hour REI and 0-day PHI, REQUIEM is safe to workers, the environment, and your neighbors. And, with up to 10 applications available per growing season, REQUIEM can help you control sucking pests throughout the year.

REQUIEM insecticide's unique, multi-site mode of action assures that it will be part of your IPM and resistance management programs for years to come. Protect your leafy vegetable & brassica crops from destructive pests with the power of REQUIEM today!

## COMPATIBILITY

REQUIEM insecticide has been tested for compatibility with other crop protection products commonly used on leafy vegetables. Requiem has been shown to be compatible with all crop protection inputs that were tested.

## FEATURES AND BENEFITS

- Controls whiteflies, thrips and other sucking pests in high-value fruits and vegetables
- Flexible use rates and application timing put growers in control
- Active against all lifecycle stages – eggs to adults
- 0-day PHI and 4-hour REI
- Exempt from residue tolerances for high value and export fruit and vegetable markets
- Multiple modes of action help growers manage resistance
- Negligible to no impact on beneficial insects
