Some things
just work

SERENADE® MAX – Proven Control of Greasy Spot and Rind Blotch on Citrus

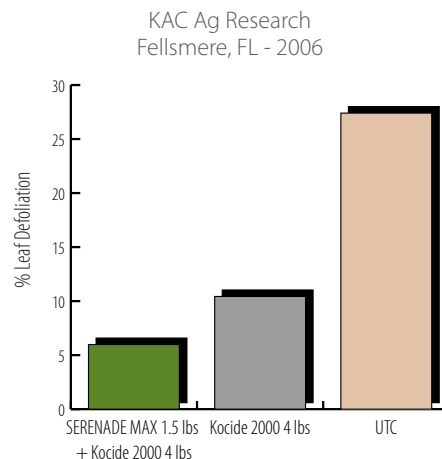

Greasy Spot and Rind Blotch can devastate a citrus grove, affecting both yield and fruit quality. SERENADE® MAX effectively and economically prevents the spread of the Greasy Spot fungus, without the drawbacks of some conventional treatments such as phytotoxicity, wind scar, or rind burn. Additionally, SERENADE MAX fungicide has been proven effective

in controlling the many diseases caused by *Xanthomonas*. Recent success in Florida grower demonstrations support the use of SERENADE MAX plus copper for bacterial canker. Save your trees and citrus crop with the proven Greasy Spot and canker protection from SERENADE MAX. SERENADE MAX - some things just work.

SERENADE MAX for Greasy Spot Control

1-3 lbs. per acre

For suppression, begin applications at first new foliar flush, and repeat with subsequent new flushes. When conditions are conducive to rapid disease development, SERENADE MAX must be used in a tank mix program with other registered products, such as spray oil or copper-based fungicides, at labeled rates.

Always read and follow label directions.

Can be used for Conventional & Organic Production
