Some things
just work

SERENADE® MAX – Proven Bacterial Speck Control of Tomatoes

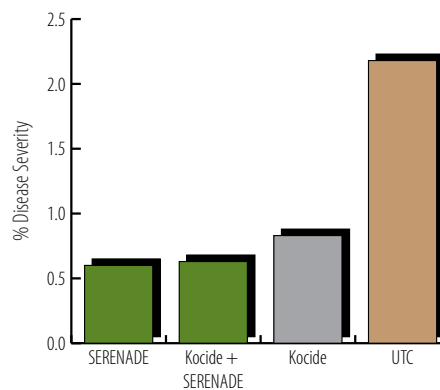

SERENADE® is proven effective for battling bacterial speck in tomatoes. Derived from *Bacillus subtilis* and powered by biochemicals called lipopeptides, SERENADE has a complex, multi-site mode of action which destroys disease pathogens while also managing resistance.

Add SERENADE to your disease program for broad spectrum disease control, superior food and worker safety, and improved overall performance. Protect your crop with the proven power of biochemistry. SERENADE - some things just work.

SERENADE MAX for Bacterial Speck

**1-3 lb.
per acre**

Begin application soon after emergence or transplant and when environmental conditions are conducive to disease development. Continue applications on a 5 to 7 day interval or as needed. Use higher rates when conditions are conducive to rapid disease development.

Can be used for Conventional & Organic Production
